

## **VACANCY**

### **Assistant Coordinator**

Part-time (20 Hours p/w) - February 2018 – July 2018

Do you have the skills and interest in improving community knowledge of and participation in protecting of Central Queensland's natural environment?

CCC is seeking an Assistant Coordinator Officer (Feb to July 2018), part-time (20 hours p/w).

You should have an awareness of the environmental challenges in Central Queensland and the ability to gather knowledge of nature conservation threats and opportunities to prevent further loss of species and habitats. You will be assisting the Coordinator with information displays, newsletters, posters and website updates as well as planning and conducting public events. In addition to representing CCC at meetings, consultation with government agencies, and other community groups you will assist in drafting of Environmental Impact Statement submissions and undertake research and analysis of environmental policies.

Expressions of interest stating your skills, qualifications, relevant experience, plus your contact details and names and contacts details for two (2) personal or professional referees should be received before **Monday, 22 January 2018**

**For more information contact:**

Michael McCabe CCC Coordinator: (07) 4927 8644 | [ccc@cqnet.com.au](mailto:ccc@cqnet.com.au) |

**Capricorn Conservation Council** since 1973 has been the principal non-government environmental organisation in Central Queensland. CCC covers environmental issues in the Fitzroy Basin, the largest catchment flowing into the Great Barrier Reef lagoon, plus the coastal and marine areas from Baffle Creek to St Lawrence and includes the Bowen and Galilee coal and gas basins.

**CCC aims to:**

- Preserve biodiversity and integrity of species and ecosystems—land, water, marine, and atmosphere.
- Prevent exploitation of the region's natural resources when it impacts on ecological sustainability.
- Ensure the community is heard on environmental issues and people receive good assistance and advice.
- Engage the community to achieve greater conservation outcomes.
